## Regarding your Future

Senator Moss has said we should not worry about the future of Social Security.

Orrin Hatch has said we should act now to correct major problems.

Here is what some leading DEMOCRATS have said about Social Security:

Senator Russell Long (Democrat, Louisiana) stated he is ready to seriously consider tapping general revenue sources to finance the system's short falls.

*Washington Post* — January 25, 1976

Congressman Glen English (Democrat, Oklahoma) said it might be better to change the structure of the Social Security system, or replace it entirely with another program, than to set a precedent of annual tax increases to offset deficits.

*Daily Oklahoman*—January 22, 1976

Senator Claiborn Pell (Democrat, Rhode Island) reported that the present Social Security System is "about \$43 billion in the black, but unless we reverse the tax structure it will go into the red sometime during 1982 and could be running a \$7 billion deficit by the end of 1983.

*Providence Journal*—January 27, 1976

Throughout this campaign Senator Moss has made personal attacks.

We have tried to stick with the issues.

We think Moss' stand on Social Security, government spending, abortion, Right to Work, etc. speaks for itself.

Orrin Hatch will vote to protect your future.

VOTE  
ORRIN HATCH  
U.S. SENATE

If he's there, you're there.
